

Stainless Steel and Alloy Steel Products Division

Manufacturing the highest quality products and equipment for the food, pharmaceutical and chemicals industry.

Food Handling Hopper and Conveyor

Diversity

Manufacturing, assembling and testing a wide range of equipment that meets the specifications of the food, chemical and pharmaceutical industries including:

- Stainless steel process piping (also used in the chemical, paper and steel industry)
- Complete machine builders in stainless steel
- Conveyors
- Stainless steel pressure vessels and process piping
- Stainless steel ductwork
- Architectural products, including custom polished railings and columns

Designed and built according to engineer's and architect's specifications

Experience

Our staff has over 40 years combined experience serving the stainless steel and alloy steel products industry.

This experience, combined with the state of the art welding technology allows Stainless Steel Division to use the best welding equipment required for the precise application. Experience counts in obtaining quality results from specialized processes, including:

- Weld conditioning techniques to eliminate distortion
- Orbital welding
- Superior workmanship in polishing and finishing to meet exacting requirements
- C.N.C. lathes and machining centers to produce components to exacting specifications

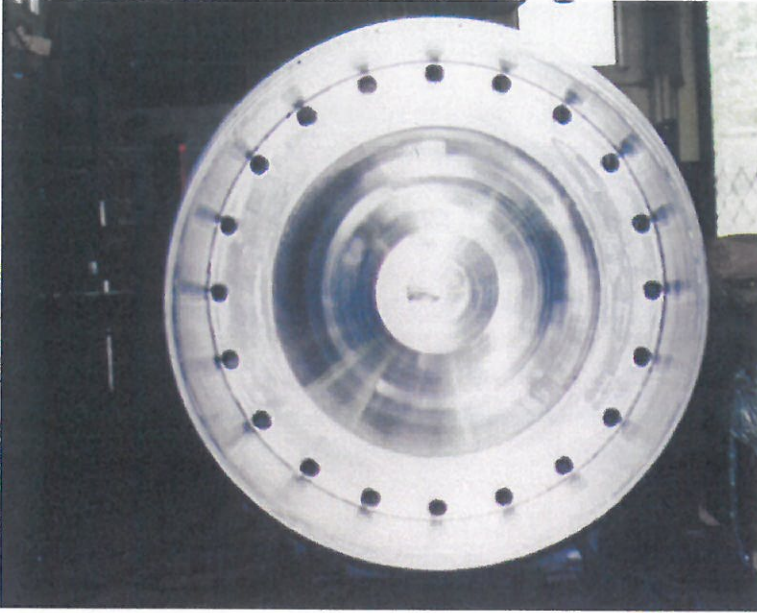

Stainless Steel Blender

- Mills up to 25' of travel
- Lathes up to 20' of travel

The division has experience with all metals, including stainless steels, Inconel®, Hastalloy and other high temperature alloy steels.

K.W.C. Stainless Steel Division: Combining experience with the latest equipment for the best quality

Filler Tank for Bottling Machine

Quality

While our specialized proprietary welding equipment guarantees accuracy, the human touch provides that further assurance specifications are met. The Stainless Steel Division provides,

- 100% inspection of all phases of production
- Finishing and polishing to 180 grit finish or as specified
- Rigorous testing of all components and machines to guarantee they will perform as specified
- All inspections and tests are documented for unmatched traceability

Before products are shipped, they must meet K.W.C.'s rigorous quality assurance program. All welding meets AWS and ASME codes and specifications.

Service

The Stainless Steel and Alloy Steel Product Division services include,

- Engineering and design services
- Complete machine shop services
- Milling machines with travels up to 25' long
- Lathes with travels up to 20' long

Kasunick Welding trucks are scheduled anywhere in the United States to assure quick turnovers and on-time deliveries.
